

# 2018 IEEE International Power Modulator and High Voltage Conference

*Jackson, Wyoming, USA – June 3-7, 2018*

*Join us for a journey into the American West!*

*General Conference Chair:  
George Laity  
Sandia National Laboratories  
grlaity@sandia.gov*

*Technical Program Chair:  
Robert Saethre  
Oak Ridge National Laboratory  
rsaethre@ieee.org*

*Jackson Lake Lodge, Grand Teton National Park, Wyoming, USA*

## 2018 IEEE International Power Modulator and High Voltage Conference

The 2018 IPMHVC will be held at the Jackson Lake Lodge, a historic resort lodge built near Jackson Lake at the seat of the Grand Teton mountain range, and a short drive from Yellowstone National Park. Attendees will enjoy panoramic views of the great American West, an abundance of available outdoor activities, as well as accommodations in forest cottages surrounding the lodge and lakefront.

The organizing committee of the 2018 IPMHVC invites paper submissions in the following categories:

- ✓ Repetitive Pulsed Power Systems
- ✓ High Power Electromagnetics & Antennas
- ✓ Accelerator & Beam Technologies
- ✓ Opening, Closing, & Solid State Switches
- ✓ Dielectrics, Insulation, & Breakdown
- ✓ High Voltage Design & Diagnostics
- ✓ Power Electronics & Power Supplies
- ✓ Biological & Environmental Applications

*Submission of abstracts will open on November 1, 2017 and will close on February 15, 2018*

In addition, the IPMHVC Executive Committee invites applications for three major awards that will be presented (*applications due December 1, 2017*):

**Kenneth J. Germeshausen Award** recognizes outstanding contributions in the science and technology of power modulators and related repetitive pulse power.

**William G. Dunbar Award** recognizes continuing contributions to high voltage research, development, or testing technology and for transferring that technology to the engineering and scientific community.

**Sol Schneider Award** recognizes continuing contributions to research, development, and test technology, as well as the dedication to the advancement of the field through fostering the power modulator and high voltage community.
